RECOMMENDED LAPTOP SPECS

1) Intel or AMD video card (2.5 GHz minimum recommended with 250mb video RAM) - No Dual Graphics processors

2) OS: Windows 10 (Windows 11 is not recommended at this time)

3) 8gRAM

4) At least 2 USB 2.0 ports (3 or more preferred)

5) Minimum 25gb HDD - SOLID STATE PREFERRED IF POSSIBLE

6) HDMI output for max resolution video

7) 1920x1080 resolution supported

NOTE: You do not require an overly robust computer to run Telescript software. Some gaming computers and graphics-focused computers have many hidden settings that can affect the smooth scroll Telescript is designed to generate. While the issue can be fixed, it may take time to discover exactly which setting is causing a jumpy scroll.
